

I don't know if I can find the words to explain the life changing and amazing experience of Wally's course. I have always been interested in the power of the mind, and have felt a need to find answers. I ventured down different avenues and paths in search of a knowledge that just seemed to almost not exist, then I met Wally. I do not believe our paths crossed accidentally.

I signed up for his course and then totally unprepared for what I was getting into, stepped into "Wally's World." I call it "Wally's World" because when you observe a teacher at work, it almost seems to me that the ones who really love what they are doing, the ones who have full confidence in the material that they are teaching, invite you into a "world." Thus is Hypnosis and Wally. A wonderful teacher, enthusiast, and now someone I can call friend. He lead our class into the most amazing discoveries and truths about Hypnosis. He brought forth the elusive answers to so many of my questions.

The stereotypes I believed about hypnosis were wiped away after the first day of class! I learned that hypnosis has been unfortunately trapped under a false persona "entertainment only." A very devastating find when you personally have felt the effects, and power it has when it comes to healing. I also learned that Wally's open-minded, friendly, and professional character, drew the most amazing and wonderful classmates, who shared their own knowledge and also put extra fun into the learning!

Thankfully, because of people like Wally, the truth and benefits of hypnosis are finally reaching people. After taking this course I have not only been able to help others but myself as well.

I can honestly say that if you are looking for an in-depth look at why we are the way were are, and how we can help others and ourselves to change for the better, plus have fun doing it, then I urge you to take Wally's course!

I urge you explore hypnosis, and to step into.... "Wally's World!"
